June 6, 2007

State Water Resources Control Board  
P.O. Box 100  
Sacramento, CA 95812-0100

To Whom It May Concern:

My husband and I own a home on a 4.01 acre property in Quail Valley. I agree that our community should have a sewer system, but it is my understanding that where we live there will be no sewer on our street. What I am concerned about is that we will still be charged the fees and taxes for sewer hook up. I believe that the entire community should be able to have a sewer system if they will be paying for it.

Environmental Health has held up a cell tower project on our property for the past two years. We are not moving any leach lines, nor are we adding any fixtures. Our septic is in the same location as it was in 1985 when the County of Riverside signed off on the permit, and now they are giving us a hard time. If this project does not go through because of them, we will loose at least \$390,000. Environmental Health turned a blind eye 4 to 5 years ago and allowed the septic systems to be installed where they shouldn't have. Now we will be paying the price.

Sincerely,

*Deborrah Miner*
