Dear Song:

Comment Letter – Quail Valley Septic Systems:

I am writing about your proposal on the phased waste discharge prohibition on the use of onsite septic tank-subsurface disposal systems in Quail Valley Area of Riverside County. It seems to me your group is more undecided on what to do out here. I have been to many of your meetings and they are going no where. It seems to me that you are trying to have the residence foot the entire bill for this system and you are not helping the voters at all. We write and complain that the system is costing too much and it should be the water districts problem of putting in the main line and not the residence. We have to pay our share in hooking up to the main line and disposal of septic system. If you would make the water district pay the main line than most of us would go along with the plan. You are finding out that we are tired of being pushed around and being overcharged for something that is not our responsibility.

As for who will benefit for this system seems to be Realtors, Developers and the Water District of this system. Each would since they would get the system for free. These people have everything to gain at our expense. A lot of properties are left vacant due to the fact they do not perk. There have been a lot of developers out here and getting land cheap and build big housing projects and it would seem they have or should be putting in the main system due to the fact they are making money and tearing up the streets all ready for their developments.

Sincerely,

Terence Nemchik
Home owner and resident
