Subject: Effects of small scale miners suction dredging

<http://www.goldgold.com/legal/waterqualityreport.htm>

Dear Sirs,

This page will explain, the effects a small scale miner has on the river system they are mining. It does so using a scientific methodology that is not comprised of emotion. In truth if you have never before been on the end of a suction hose under the river you may well have visions of things that just don't happen.

Please consider the real science and the affect your decision will have on real people and their business.

Also if you have the opportunity to try it (dredging) I believe you will find the truth that you seek.

Respectfully,

Bruce Johnson
