Subject: Comment Letter - Suction Dredge Mining

I am writing to oppose AB1032 ,
I think it is OK for people to help to look after our resources ,
what bothers me is that there is so much imposed on others by people
that do not know facts , but believe fact-less opinions .
Then are so called elected officials & representatives appear to
chase these ghosts around wasting time & money .
This is besides the sell out our country to corporate interests .
In this case NO thanks
John Faughn
