Subject: we want to keep the right to dredge in streams

Sir, although I am not from California I have been stationed there and I love dredgeing and panning for gold in the streams. I believe that since this has been going on for years and has never hurt the fish or the water ways I ask that you dont take away the one pleasure that people have especially us retired with nothing more to do but, to dredge and pan for gold. Thank you Larry Courtney Schaumburg, IL
