**AGENDA**

Introductions; Meeting Overview

- Program Overview – *SWRCB*
- Basin Assessment Implementation and Preliminary Results – *USGS*
- Wrap-up and Adjourn

**Background:** The Santa Barbara (South Coast Basin) study unit includes areas in Santa Barbara and Ventura counties.

The GAMA Program was created as a result of statewide groundwater quality concerns and was later expanded by the Groundwater Quality Monitoring Act of 2001 (AB 599). The primary objectives of the GAMA Program are to improve comprehensive groundwater quality monitoring and to increase public availability of groundwater quality information. Participation is voluntary. The State Water Board implements the GAMA Program with the US Geological Survey and Lawrence Livermore National Laboratory.
