

CWA 319(h) NPS Grant Program FAQs

1. **What if my proposed project is being undertaken pursuant to a National Pollutant Discharge Elimination System (NPDES) permit, including a municipal stormwater permit or municipal separate sewer system (MS4) permit?**

Projects which include activities required under a NPDES and/or MS4 permit are not eligible for CWA 319(h) funding. See project eligibility requirements in the [Program Guidelines](#). Please contact your Regional Water Board Grant Coordinator ([Appendix 7](#)) if you have questions regarding your project's eligibility.

2. **When completing my Concept Proposal on-line in the Financial Assistance Application Submittal Tool (FAAST), how do I determine the amounts to list for the "Project Budget," "Funds Requested," and "Local Match" fields?**

The match is calculated as a percentage of the total project budget, not as a percentage of the grant funds requested. See the example below for reference.

Example:

Project Budget (total project): \$1,000,000

Local Match: \$250,000 (25% of \$1,000,000)

Funds Requested: \$750,000 (\$1,000,000 - \$250,000)

3. **What are the funding match requirements for the CWA 319(h) NPS Grant Program?**

This program requires a minimum match of 25% of the **total project cost**. The match requirement may be waived or reduced for projects that directly benefit a disadvantaged community(ies) as outlined in [Appendix 4](#) and Section D and Section E of the [Program Guidelines](#).

"Funding match" means funds made available by the applicant from non-state sources, unless the applicant is a state agency. State agencies can use state funds and services for the funding match.

Applicants who are not state agencies can use, but are not limited to, Federal funds, local funding, or donated and volunteer services from non-state sources. Contact the Division of Financial Assistance ([Appendix 7](#)) to verify whether the match source is appropriate.

4. **What types of funding match can be used?**

Contact the Division of Financial Assistance to determine whether the match source is appropriate for the Project. See [Appendix 7](#) for contact information.

5. **Can the total project cost over the amount of \$750,000 for Implementation and \$125,000 for Planning/Assessment Projects**

CWA 319(h) NPS Grant Program FAQs

indicated in the Program Guidelines?

Yes, the total project cost can be more than \$750,000 for Implementation and \$125,000 for Planning/Assessment. However, CWA 319(h) funding is limited to those levels (\$750,000/\$125,000) per project type. For example, if the total project cost is \$1M for an Implementation project, the maximum amount of CWA 319(h) requested for that project can only be \$750,000. The remaining amount (\$250,000) needs to be covered through match funding.

6. **What kind of documentation is needed for match (in-kind and/or funding)?**

Document match activities with photos and invoices for costs associated with match activities. Provide information in progress reports, which are generally submitted with invoices.

If the applicant is requested to submit a Full Proposal, they are required to submit a Letter of Commitment for the match as one of attachments.

7. **If the applicant does not meet any of the Program Preferences, can they still continue in the RFP process?**

No. The applicant must meet the Program Preference requirement (See [Program Guidelines](#)).

8. **Where can I find the latitude and longitude coordinates, and the 12 digit hydrologic unit code and watershed name for my project location?**

Please try the following website: <http://www.topozone.com/> enter the name of a place nearest to your project location, and run a search for it. The results will include the latitude and longitude for the location. For the 12 digit hydrologic unit code and watershed name use <http://iaspub.epa.gov/pls/grts/f?p=110:95:4338160915976545::NO>.

CWA 319(h) NPS Grant Program FAQs

9. **What are the nine elements of a watershed-based plan?**

The nine key elements of watershed-based plans, which are explained in detail in Appendix 1 of the [Program Guidelines](#) , are:

1. CAUSES AND SOURCES;
2. EXPECTED LOAD REDUCTIONS;
3. MANAGEMENT MEASURES;
4. TECHNICAL AND FINANCIAL ASSISTANCE;
5. INFORMATION/EDUCATION;
6. SCHEDULE;
7. MEASURABLE MILESTONES;
8. EVALUATION OF PROGRESS; AND
9. MONITORING

10. **Does the applicant need to reproduce the Nine Key Elements in their final product?**

No, the application needs only to refer to the Nine Key Elements and does not need to reproduce them.

11. **Can CWA 319(h) funds be used to pay for implementation project monitoring since the guidelines state that operation and maintenance, including post construction project performance and monitoring costs are not reimbursable costs?**

Short-term monitoring for project performance and effectiveness is an eligible cost under the CWA 319(h) program if it is conducted within the grant period. Long-term monitoring after the grant period is not a reimbursable cost.

12. **Can we start implementing our project before the grant agreement is finalized?**

Match funds can be used to cover costs that are incurred before the grant has been executed. However, using match funding to cover costs before the execution of the grant is at the risk of the grantee. CWA 319(h) cannot be used to cover costs incurred before the grant has been executed.

13. **Can time spent preparing a proposal be reimbursed?**

No, the expense of preparing proposals cannot be reimbursed.

14. **What is required for Global Positioning System (GPS) coordinates?**

For CWA 319(h), GPS coordinates only need to be reported for the location of the stream reach, not for the exact location of the Management Practice implemented.

CWA 319(h) NPS Grant Program FAQs

15. How will projects be selected for funding?

A review team consisting of State Water Board, U.S. Environmental Protection Agency (USEPA), and Regional Water Board staff will participate in the selection of projects. The CWA 319(h) NPS Grant Program Solicitation will be a two-step process. Each proposal will receive a review from at least three (3) different organizations; one of those organizations will be the Regional Water Board where the project is located. In the first step, applicants will submit brief Concept Proposals (CPs) using the State Water Board's on-line Financial Assistance Application Submittal Tool (FAAST). Applicants with the highest-ranking CPs will be invited to submit a Full Proposal (FP). After a thorough review of all FPs by the same review team, a recommended funding list will be developed and presented to State Water Board Executive Director for approval.

16. To whom should we send letters of support for our Concept Proposals?

Letters of support are not required in order to be considered for grant funding, and are not considered in the technical evaluation of the proposal. The Concept Proposal attachments have strict pages limit (See [Attachment 2](#) of the Solicitation Notice. It is up to you to use these two pages for letters of support or to further describe your project.

17. What types of landowner access agreements are needed?

If your project requires landowner access and you are selected for funding, you will need to provide adequate access to State Water Board, Regional Water Board and U.S. EPA staff to inspect and verify the project is being implemented according to the grant agreement. There should be a process in place to obtain landowner agreement at the time of submitting a Full Proposal (FP) (if applicant is requested to submit a FP). Landowner access agreements, if applicable, must be in place before the projects starts.

18. After the project is implemented, what type of access to the project site needs to be provided?

Grantees must allow access to the project site to both State Water Board and U.S. EPA for the service life of any practices installed. The service life of the practice can range from one to twenty years.

19. Are organizations limited to the number of projects they can submit?

No, there no limits to the number of projects that an organization can submit. For example, the applicant can submit a proposal for both Implementation and Planning/Assessment Projects.
