

State Water Resources Control Board

JUL 2 5 2018

Mr. George Piantka Director of Regulatory Environmental Services NRG Energy, West Region 5790 Fleet Street, Suite 200 Carlsbad, CA 92008-4703

Dear Mr. Piantka:

RE: INVOICE FOR THE 2016-2018 INTERIM MITIGATION PERIOD FOR MANDALAY GENERATING STATION - ONCE-THROUGH COOLING POLICY

This letter serves as an invoice for Mandalay Generating Station's interim mitigation payment during the operating period of October 1, 2016 through February 5, 2018. The Final Determination calculating the interim mitigation payment is included as Attachment A.

The State Water Resources Control Board (State Water Board) Statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling or OTC Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015 and continues up to and until owners or operators achieve final compliance with the OTC Policy. Section 2.C(3) of the OTC Policy provides options for demonstrating compliance with the interim mitigation requirements.

NRG retired Mandalay Generating Station's Units 1 and 2 on February 5, 2018, and elected to have the interim mitigation payment for the final months of operation included in the 2016-2017 interim mitigation period. After this payment, Mandalay Generating Station will be fully compliant with the interim mitigation requirement of the OTC Policy.

As stated in the 2015-2016 Final Determination for Mandalay Generating Station¹, NRG Energy, Inc. (NRG) elected to comply with interim mitigation requirements in Section 2.C(3)(b) of the OTC Policy. This option demonstrates compliance with the interim mitigation requirement by providing funding to the Ocean Protection Council or California Coastal Conservancy to fund an appropriate mitigation project.

¹ 2015-2016 Final Determination for Mandalay Generating Station: https://www.waterboards.ca.gov/water_issues/programs/ocean/cwa316/docs/mandalay_1516mitigaiton_letter.pdf

The State Water Board calculated the interim mitigation payment for the October 1, 2016 through February 5, 2018 interim mitigation period using information provided by NRG in their February 9, 2018² and April 27, 2018³ information response letters. The annual interim mitigation payment is the sum of three components: an entrainment payment, an impingement payment, and a management and monitoring payment. The interim mitigation payment for Mandalay Generating Station for the operating period of October 1, 2016 through February 5, 2018 is \$147,621.48.

NRG has 60 days from receipt of this letter to make this payment to the California Coastal Conservancy. When submitting this payment, include a cover letter that identifies the National Pollution Discharge Elimination System number for Mandalay Generating Station and copy Karen Mogus, Director of the Division of Water Quality at the State Water Board. Please make the check payable to the State Coastal Conservancy and send to:

Mary Small
State Coastal Conservancy
1515 Clay St. Suite 1000
Oakland, CA 94612
Reference Account # 3760-801-8029018

If you have questions regarding this invoice letter, please contact Julie Johnson at (916) 341-5687 (Julie.Johnson@waterboards.ca.gov) or Katherine Faick at (916) 445-2317 (Katherine.Faick@waterboards.ca.gov).

Sincerely,

Eileen Sobeck
Executive Director

Attachment A - Final Determination for Mandalay Generating Station

FINAL DETERMINATION TO APPROVE MITIGATION MEASURES FOR THE WATER QUALITY CONTROL POLICY ON THE USE OF COASTAL AND ESTUARINE WATERS FOR POWER PLANT COOLING:

MANDALAY GENERATING STATION OCTOBER 2016 THROUGH FEBRUARY 2018

Interim Mitigation Requirements and Determinations

The State Water Resources Control Board's (State Water Board) Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling [OTC] Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015, and continues up to and until owners or operators achieve final compliance with the OTC Policy.

NRG Energy, Inc. (NRG) retired Mandalay Generating Station's Units 1 and 2 on February 5, 2018. NRG elected to have the interim mitigation payment for the final months of operation of Mandalay Generating Station's Units 1 and 2 included in this Determination. Therefore, this Determination contains the interim mitigation payment calculations for Mandalay Generating Station from October 1, 2016, through February 5, 2018.

The State Water Board approved Mandalay Generating Station's request to comply with the interim mitigation measures described in Section 2.C(3)(b) of the OTC Policy in the Final Determination¹ for the October 1, 2015, to September 30, 2016, interim mitigation period (2015-2016 Final Determination). The 2015-2016 Final Determination also included the interim mitigation payment for the period of October 2015 through September 2016, comprised of an entrainment fee, an impingement fee, and a management and monitoring fee, consistent with Resolution No. 2015-0057² and the recommendations in the Expert Review Panel's Final Report³.

The State Water Board calculated Mandalay Generating Station's interim mitigation payment for October 1, 2016, through February 5, 2018, consistent with the methods and calculations applied in the 2015-2016 Final Determination.

Interim Mitigation Payment Calculation for Mandalay Generating Station

Entrainment Payment Calculation

October 1, 2016 through September 30, 2017

To calculate the interim mitigation payment to offset entrainment impacts, the State Water Board used the default average cost of entrainment. Consistent with Resolution No. 2015-0057 and the Expert Review Panel's Final Report, the State Water Board used a three percent escalator to update the average cost of entrainment from the 2015-2016 Final Determination to 2017 dollars to account for inflation. The resulting entrainment cost for October 2016 through September 2017 increased from \$4.73 per million gallons (MG) to \$4.87/MG:

$$(\$4.73/MG \times 0.03) + \$4.73/MG = \$4.87/MG$$

In their February 9, 2018 letter⁴, NRG provided the intake volume for Mandalay Generating Station from October 2016 through September 2017, totaling 19,868.54 MG. The State Water Board compared intake volume with the data submitted in the National Pollution Discharge Elimination System (NPDES) permit monitoring reports for Mandalay Generating Station. The State Water Board noted some discrepancies between the intake volume data provided in the February 9, 2018, letter and the NPDES monitoring data. NRG confirmed in an email dated April 18, 2018, that the NPDES data are accurate and should be used in the entrainment calculation for the October 2016 through September 2017 operating period.

To calculate the entrainment payment, the State Water Board multiplied the intake volume by the updated cost of entrainment:

$$4.87/MG \times 19,869.04MG = 96,762.22$$

October 1, 2017 through February 5, 2018

To calculate the interim mitigation payment to offset entrainment impacts during the final months of operation at Mandalay Generating Station (October 1, 2017, through February 5, 2018), the State Water Board used a three percent escalator to update the average cost of entrainment from the 2016-2017 operating period calculated above to 2018 dollars to account for inflation. The resulting entrainment cost for October 2017 through February 2018 increased from \$4.87/MG to \$5.02/MG:

$$(\$4.87/MG \times 0.03) + \$4.87/MG = \$5.02/MG$$

⁴ Letter from George L. Piantka, NRG, to Eileen Sobeck, State Water Board on February 9, 2018. https://www.waterboards.ca.gov/water issues/programs/ocean/cwa316/powerplants/mandalay/docs/mandalay 1 617inforequest resp.pdf>

In their April 27, 2018 email, NRG provided the intake volume for Mandalay Generating Station from October 2017 through February 2018, totaling 5,210.7 MG⁵. The State Water Board verified the intake volume with the data submitted in the NPDES permit monitoring reports for Mandalay Generating Station.

To calculate the entrainment payment for October 2017 through February 2018 the State Water Board multiplied the intake volume by the updated cost of entrainment:

$$$5.02/MG \times 5,210.7MG = $26,157.71$$

The total entrainment payment to offset entrainment impacts from October 2016 through February 2018 is \$122,919.93.

$$$96,762.22 + $26,157.71 = $122,919.93$$

Impingement Payment Calculation

In their February 9, 2018 letter, NRG provided the actual annual mass of fish impingement for Mandalay Generating Station from October 2016 to September 2017, totaling 108.85 pounds. The mass of fish impinged was determined from quarterly fish counts conducted from October 2016 through September 2017, totaling 108.85 pounds. The actual mass of fish impinged as determined from quarterly fish counts conducted from October 2017 through February 2018 was 13.61 pounds. The State Water Board calculated the impingement payment for October 2016 through February 2018 using the annual total pounds of fish impinged plus the total pounds of fish impinged during the final months of operation multiplied by the average indirect economic value of the fisheries as determined in the Expert Review Panel's Final Report of \$0.80 per pound:

$$0.80/pound \times (108.85pounds + 13.61pounds) = 97.97$$

Management and Monitoring Payment Calculation

The State Water Board calculated the management and monitoring fee by taking twenty percent of the sum of the entrainment and impingement payments:

$$0.20 \times (\$122,919.93 + \$97.97) = \$24,603.58$$

⁵ Supplemental data for Mandalay Generating Station from George Piantka (NRG) to Katherine Faick (State Water Board) on April 28, 2018.

https://www.waterboards.ca.gov/water issues/programs/ocean/cwa316/powerplants/mandalay/docs/mandalay 1 617inforequest supp.pdf>

State Water Board's Final Determination for Mandalay Generating Station

Based on the sum of the entrainment, impingement, and management and monitoring payment calculations, the total payment is \$147,621.48 to fulfill the interim mitigation obligation for NRG Energy's Mandalay Generating Station for the operating period of October 1, 2016, to February 5, 2018.

122,919.93 + 97.97 + 24,603.58 = 147,621.48
