

#76

Dear Sir:

1 → How can you so off handed, just decided that we all need to make the kind of changes, without any consideration to the home owners and how it will effect them and their lives by passing such a cruel regulation? I don't understand how things like this can happen.

I saved and worked all my life and now as a 100% Disabled, Service Connected Veteran, after waiting for years looking for over 7 months, found the house of my dreams in the place of my dreams, Silverado and bought my home in DEC 2010. I received a VA Mortgage and am in the process of receiving a remodeling Grant from the VA to make the home accessible for the wheelchair and now, your going to pass new regulations that I will never be able to comply with and I will lose my home. I live on a lot, connected to the Silverado Creek, in fact my home is the only house that is actually built over the creek and my basement walls are the walls of the creek. My septic is on the other side of this wall, less than 30 feet from the creek and my whole lot is less than 100 feet wide so how in the world could I ever move my septic to be 600 feet from this creek? It's impossible and all of us who live along this creek will lose our homes because you have decided this is to be. It's a crying shame that you could do such a thing without even taking into consideration those of us who make our homes in this wonderful rural area.

I live on a very limited income and so do many others who choose to make this historical area our homes. Since the early 20's this unique place has been the home of those who do not want to live in condo's, box houses, planned communities, cities etc. We suffer hardships and a life that is not for everyone because we love it here. You not only will ruin our lives, but the town, the area, and the future of our children and families.

3 → On top of that, you will force our County to again take on a project with no funds to do so. Again the bureaucracy of your thinking, without consideration to anyone

4 ↑

4 → but your values and what you want, will effect those who's lives are built in this area and I don't understand how that can happen.

Please stop this!!!!!!
