Subject: SSS WDRs revisions

I currently administer 2 wastewater systems enrolled in the SSO Program because those 2 systems have slightly over one mile of pipe.

I see the proposed revisions have applicability criteria that include systems with lengths of pipes greater than one mile AND convey or collect more than 25,000 gallons per day of untreated or partially treated wastewater.

Since neither of the 2 systems I administer conveys more than 25,000 gallons per day would I be able to dis-enroll my 2 systems from the SSO Program because they no longer meet the applicability criteria?

Thank you.
