Re: 2012 Draft National Pollutant Discharge Elimination System (NPDES) General Permit for the Discharge of Storm Water Associated with Industrial Activities (2012 Draft NPDES Industrial General Permit)

To Whom It May Concern;

1 The proposed changes to the Industrial General Permit will burden small business owners like C.E. Wilson Corporation with increased costs and paperwork. The Water Board should consider the economic impact on facility owners before adopting regulations that could significantly increase operational costs and make it impossible to conduct business in the State of California. The proposed regulations are bureaucratic baloney and should not be adopted.

Sincerely,

A handwritten signature in cursive script that reads "C.E. Wilson".

C.E. Wilson  
C.E. Wilson Corporation
