Subject: Selenium Control

California state Water Resources Control Board -

The proposed Approval of Amendments to the Water Quality Control Plan for the Sacramento River and San Joaquin River Basins to Address Selenium Control in the San Joaquin River Basin must not be approved. What industry would be allowed to pollute from 1996 to 2019? It would be unconscionable to continue this pollution. If this pollution continues a strong monetary fine must be collected from the polluters. This pollution has been shown to cause significant health problems to wildlife in the past. It must be stopped for the health of people and wildlife of our State.

Can you imagine the BP oil well pollution going on for the 13 years being allowed for the Selenium Pollution!!!!
