"Comment Letter - Huntington Center Car Wash Case Closure Summary"

Mr. Peter Mizera,
State Water Resources Control Board,
1001 I Street, 16th. Floor,
Sacramento, CA. 95814

Dear Sir,

We, Anthony C & Shiranee B Rodrigo are the owners of the Montessori School (pre-school) at 7945 Aldrich Dr. Huntington Beach, located next to the above car wash.

Frey Environmental requested Temporary access to the school property to install under-ground piping and additional test wells for their water injection extraction system to extract contaminants from ground water. This operation was concluded in September 2012. All the equipment installed for this operation were removed in the car wash property and leaving all the piping and test wells in School property abandoned.

The second temporary access permit was granted to install two vapor monitoring probes namely SV3 & SV4 per site sketch dated August 2011. The vapor probes were NEVER INSTALLED or monitored. In the report they have mention that the exposure is minimal because the car wash property is paved. Since School play yard is not paved, is there any danger of vapor exposure?

The cover plates on the test wells are a trip hazard. The pictures attached. I have been in contact with MR. Andy Wittmann at Frey Environmental and Ms. Geniece Higgins (hazardous Waste Specialist) at Orange county Health Care Agency regards to above concerns.

Home Tel. # 714-892-2099
Cel. # 714-791-3021
Work # 714-894-9922

Thanking you,
Yours truly

Anthony C Rodrigo
