DIV. OF WATER RIGHTS
SACRAMENTO

PETITION FOR EXTENSION OF TIME

WATER USERS:

Application 23416 Permit 16762

Water Code section 1396 requires an applicant to exercise due diligence in developing a water supply for beneficial use. The State Water Resources Control Board (SWRCB), in considering requests for extension of time, will review the facts presented to determine whether there is good cause for granting an extension of time to complete the project. Where diligence in completing the project is not fully substantiated, the SWRCB may set the matter for hearing to determine the facts upon which to base formal action relating to the permit. Formal action may involve:

1. Revoking the permit for failure to proceed with due diligence in completing the project.
2. Issuing a license for the amount of water heretofore placed to beneficial use under the terms of the permit.
3. Granting a reasonable extension of time to complete construction work and/or full beneficial use of water.

The time previously allowed in your permit within which to complete construction work and/or use of water has either expired or will expire shortly.

Please check below the action you wish taken on this permit.

- The project has been abandoned and I request revocation of the permit.

Signature
- Full use of water has been made, both as to amount and season, and I request license be issued.

Signature
- The project is not yet complete. I request the SWRCB's consideration of the following petition for an extension of time.

**PETITION FOR EXTENSION OF TIME
If START of construction has been delayed**

Complete items 1, 2, and 3.

1. What has been done since permit was issued toward commencing construction?
N/A

2. Estimate date construction work will begin. N/A

3. Reasons why construction work was not begun within the time allowed by the permit.
N/A

PETITION FOR EXTENSION OF TIME
If construction work is proceeding

If construction work and/or use of water is proceeding but is not complete, an extension of time may be petitioned by completing items 4 through 16. Statements must be restricted to construction or use of water only under this permit.

4. A 10 - year extension of time is requested to complete construction work and/or beneficial use of water. (Indicate period of time. Must be consistent with time frame allowed in "Guidelines for considering Petitions for Extensions of Time.")
5. How much water has been used? 1769 acre-feet/year N/A cfs see attachment
6. How many acres have been irrigated? see attachment
7. How many houses or people have been served water? 2000 connections (see attached graph)
8. Extent of past use of water for any other purpose. Municipal/Industrial/Recreation
9. What construction work has been completed during the last extension? see attachment
10. Approximate amount spent on project during last extension period. \$ see attachment
11. Estimate date construction work will be completed. N/A
12. Estimated year in which water will be fully used. 2020
13. Reasons why construction and/or use of water were not completed within time previously allowed. Rancho Murieta is still developing; new home construction averaging 60 new homes per year

If the use of water is for municipal (including industrial) and irrigation supplies and is provided or regulated by public agencies and use of the water has commenced, but additional time is needed to reach full use contemplated, the following information must be provided.

14. What water conservation measures are in effect or feasible within the place of use?
(1) all services metered (2) consumption billings (3) 100% wastewater recycled (4) Board approved conservation ordinance (5) participation in Water Forum
15. How much water is being conserved or is it feasible to conserve using these conservation measures?
600 acre-feet per annum. (recycled wastewater - see attached graph)
16. How much water per capita is used during the maximum 30-day period? 500 ~~gpm~~ gpm

I (we) declare under penalty of perjury that the above is true and correct to the best of my (our) knowledge and belief.

Dated: November 27, 2000, at Rancho Murieta, California

EDWARD McROUSE
GENERAL MANAGER Signature(s)

 Telephone No.

NOTE: A \$50 FEE MADE PAYABLE TO THE State Water Resources Control Board must accompany a petition for an extension of time. An \$850 fee made payable to the Department of Fish and Game must accompany all but the first petition for an extension of time.

Expanded Answers

5. How much water has been used?

Since this petition was last extended, the District continues to increase water diversion. The most recent 10-year history showing an increasing trend is graphically presented on the attached graph. In 1990, the District diverted approximately 1200 acre-feet and in 2000 the District diverted nearly 1800 acre-feet for a 50% increase over 1990 diversions.

6. How many acres have been irrigated?

Parks - 30 acres
Landscaping - 60 acres
Golf - 330 acres

7. How many houses have been served?

Currently, there are over 2000 water connections in the District serving a population of nearly 5,000 people.

The Rancho Murieta planned development was approved by Sacramento County in 1969 and has continued its growth since then. The most recent ten-year period shows the District growing an average of 2.5% per year. In 1990, there were approximately 1300 connections and in 2000, there are over 2000 connections.

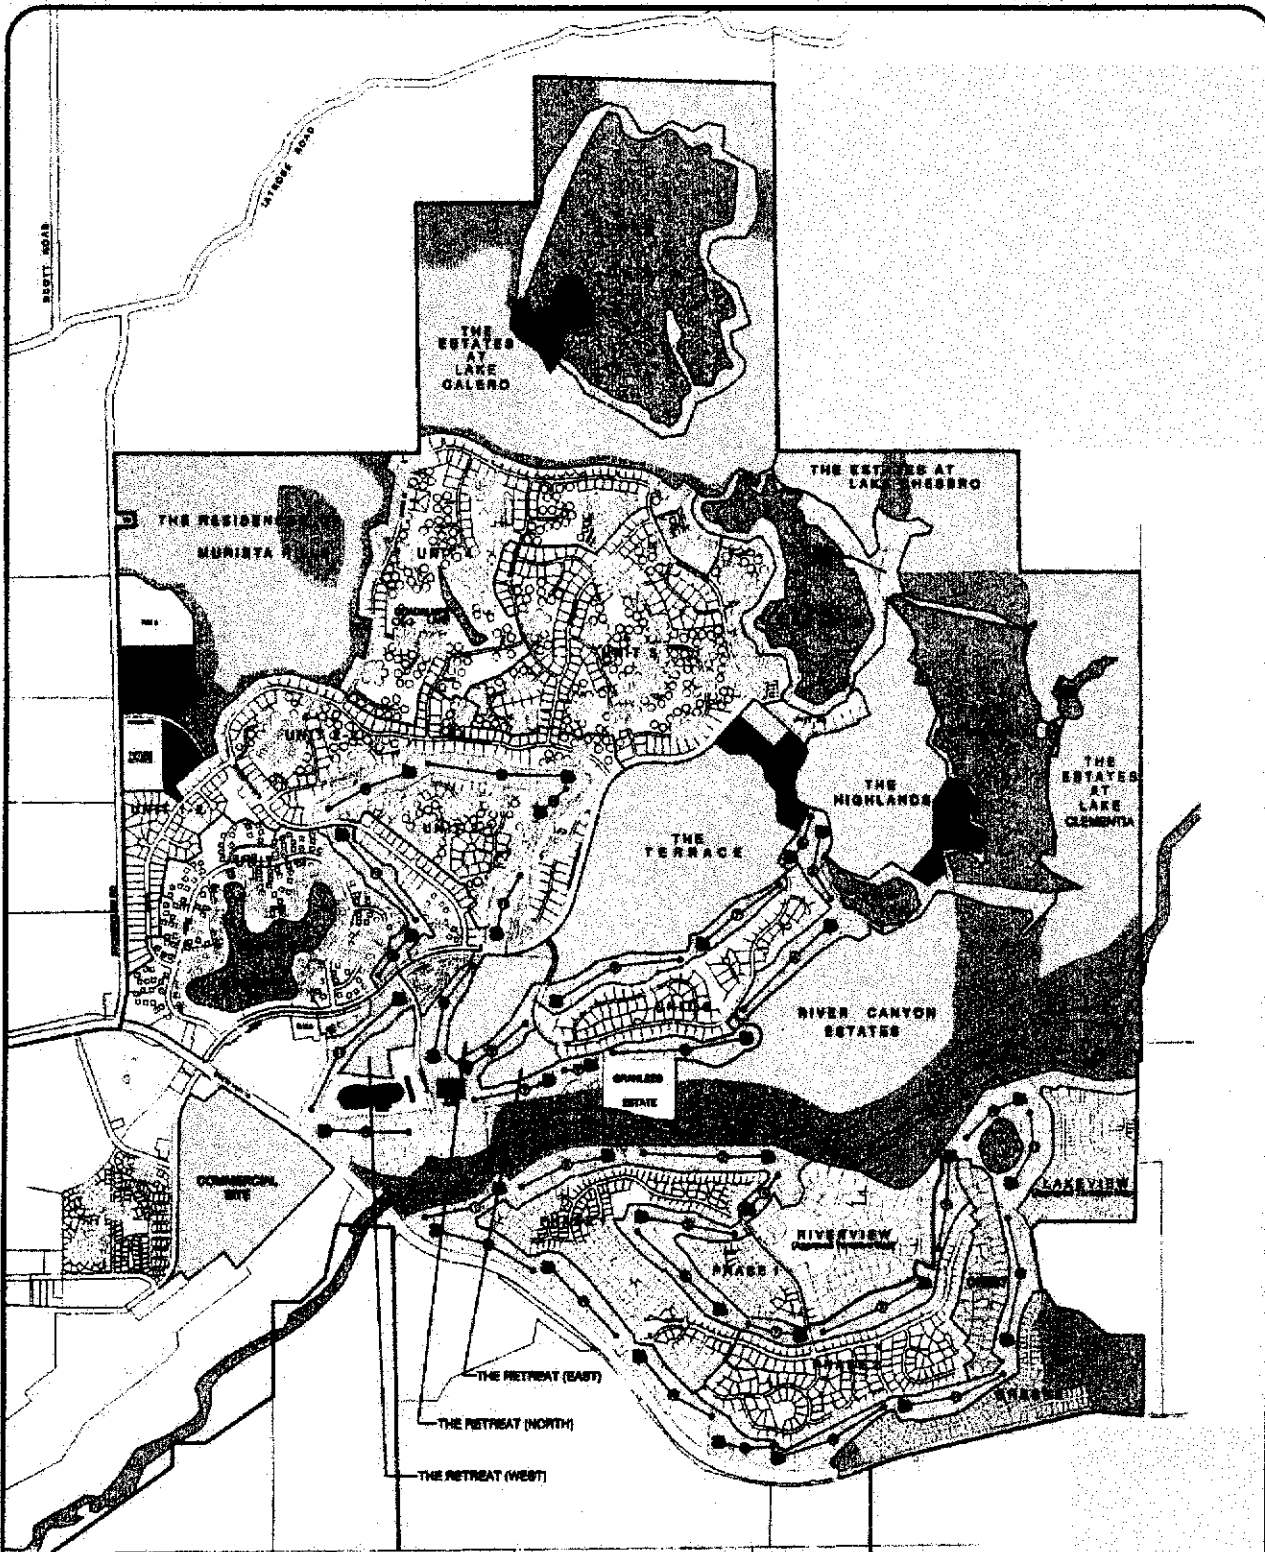

Most recently this fall, a new developer entered the community with plans to complete full build out of the planned 4100 connections. The areas in yellow in the attached exhibit show the new proposed areas of development.

9. What construction work has been completed since the last extension?

Lake Calero was completed in 1982 at a cost of approximately 5 million dollars. In addition, the District completed the second phase expansion of the water plant in 1987 at a cost of 4 million dollars. In the early 90's the distribution system expanded to serve development on Rancho Murieta South including a 3.0 million gallon concrete and steel above-ground reservoir.

Near term future plans call for expansion of the District's water plant capacity to serve the full build out.
