**Response to Comments
on Bay-Delta Plan**

(5/22/95)

Page 86, 2nd response - Replace the first and second sentences with: "The SWRCB is not requiring the USBR to meet the flow objectives prior to adoption of a water right decision. This requirement is being imposed by the USFWS under authority of the federal ESA. The USBR is likely to meet these flow requirements through releases from New Melones Reservoir."

Page 90, 1st response - [same as modification on page 86, above]
