

Our Water district has 920 connections. Since 2013 we have had 70 new homes built. If we take our master meters at each water well as our gallons used and use the 2013 year as our base we will be cutting back more than 25% because of the new homes since 2013. We do not have meters on houses we use a flat rate. Thank You. James Scheimer, Manager Arbuckle Public Utility District.
