

To Whom it May Concern,

This letter is to voice my significant concern over the apparent intent of the Substitute Environmental Document. To be clear and concise, it is my strong opinion that we need MORE fresh water released into the San Joaquin River, NOT less, and there should be ZERO tolerance for any reduction of water quality and salinity standards for the River. We need to protect the Delta for future farming, fishing, and general water and ecological health. If the intent of the SED is to reduce freshwater flow and increase salinity allowance, then please consider this my resounding NO!, and rest assured that I will be keeping a watchful and interested eye on this issue and I intend to stay as active as possible in my opposition to any degradation of the fragile Delta economy.

Thank you for your consideration,

John Grinager
