| 8q. Amount (Acre-Feet) projected for 2015                          |  |
| 8r. Exchange or settlement of prior rights                         |  |
| 8s. All monthly reported diversion claimed under the prior rights  |  |
| 8t. Amount (Acre-Feet) of reported diversion solely under contract |  |

| 5. Water Diversion Measurement |   |  |
|--------------------------------|---|--|
| a.                             | Measurement   | Direct measurement using a device listed in Section 1 is "not locally cost effective" for water directly diverted and/or diverted to storage |
| b.                             | Types of measuring devices used   |  |
| c.                             | Additional technology used  |  |
|                                | Description of additional technology used   |  |
| d.                             | Who installed your measuring device(s)  |  |
| e.                             | Make, model number, and last calibration date of your measuring device(s)                               |  |
| f.                             | Why direct measurement using a device listed in Section 1 is "not locally cost effective"               | Other  |
|                                | Explanation of why use of devices and technologies listed in Section 1 are "not locally cost effective" | In most years we don't use 100% of our 3,284.7 AcFt license face value so we have had no reason to justify meter/labor costs.                |
| g.                             | Method(s) used as an alternative to direct measurement  | Crop duty estimates/consumptive use estimates  |
|                                | Explanation of method(s) used as an alternative to direct measurement                                   |  |

| 6. Purpose of Use |             |
|-------------------|-------------|
| Irrigation        | 467.2 Acres |

| 7. Changes in Method of Diversion |  |
|-----------------------------------|--|
|                                   |  |

| 8. Conservation of Water |  |   |
|--------------------------|--|---|
| a.                       | Are you now employing water conservation efforts?  | Yes   |
|                          | Describe any water conservation efforts you have initiated                                 | IN-FIELD recirculation ditches, gravity flow to laser fields, eventual return to Colusa 2047 main drain, to flow south and next farm or ranch. Wild life habitat year around. In this drought year, 25% of our rice farm land was not planted. This further reduced amount of water diverted. |
| b.                       | Amount of water conserved  | Acre-Feet   |
|                          | I have data to support the above surface water use reductions due to conservation efforts. |   |

| 9. Water Quality and Wastewater Reclamation |   |    |
|---|---|----|
| a.  | Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility, or water polluted by waste to a degree which unreasonably affects such water for other beneficial causes? | No |
|   | Amount of reduced diversion   |    |
|   | Type of substitute water supply   |    |

|    |   |  |
|----|---|--|
| b. | Amount of substitute water supply used  |  |
|    | I have data to support the above surface water use reductions due to the use of a substitute water supply |  |

**10. Conjunctive Use of Surface Water and Groundwater**

|    |  |    |
|----|--|----|
| a. | Are you now using groundwater in lieu of surface water?                                      | No |
| b. | Amount of groundwater used   |    |
|    | I have data to support the above surface water use reductions due to the use of groundwater. |    |

**11a. Additional Remarks**

25% of the face value of our water licenses were not used as part of the 25% cutback during the drought to conserve and reduce AcFt of water diverted.
