

the monterey peninsula does not have water in excess of that amount that is now being pumped out the carmel river but cal am and the warer board in cahoots with the board of supevisors all receive bribes from developers or new hool-ups. ask about sept ranch, carmel valley village, chomp ryan ranch service-all are being planned with water allocation from noexistent water.

stringent water restrictions are desparately needed to stop the developer/ governments"raids on the water trickeles that remain je hicks
