

As concerned citizens and property owners, my household is adamantly opposed to Cal Am's decision to further restrict our water consumption to unheard of levels. Instead of rationing our water beyond acceptable levels, why can't we find a more effective managing system that puts the needs of PEOPLE and PROPERTY OWNERS above that of fish in the Carmel river...that are NOT even endangered!

I speak not only for myself, but all of my neighbors and fellow land owners when I say that I am VEHEMETLY OPPOSED to this "police-state" like control of my water and property rights. I intend to follow, fight and recruit as many people as I can in our attempt to resist this completely unreasonable seizure of my personal property rights.
