RE: SWRCB Order No. WR 95-10
July - September Quarterly Report

Dear Mr. Schueller:

As a condition of the subject order, we are filing herewith our *final quarterly* report for the water year October 1, 1999 through September 30, 2000 updating the status of Condition Nos. 2, 3(a), 4, 5, 6, 7, 8, and 12, including the supporting backup information for each condition.

Enclosed and made part of this report is the *monthly* report required under Condition Nos. 3(b) and 5. Also included are the following:

1. Carmel Valley Wells - Production Water Year
2. Carmel Valley and Seaside Production - Water Year to Date
3. Net System Production - Year to Date
- 4a. Carmel Valley Filter Plant - Monthly reports - Oct. 1999 - Sept. 2000
- b. Carmel Valley Wells - Production - Oct. 1999 - Sept. 2000
- c. Water West (CV) Production - Oct. 1999 - Sept. 2000
5. Water Supply and Budget

Administration

SWRCB - ORDER NO. WR 95-10
Quarterly Report - July/September 2000

ORDER CONDITION NO. 2

Cal-Am shall diligently implement one or more of the following actions to terminate its unlawful diversions from the Carmel River: (1) obtain appropriate permits for water being unlawfully diverted from the Carmel River, (2) obtain water from other sources of supply and make one-for-one reductions in unlawful diversions from the Carmel River, provided that water pumped from the Seaside aquifer shall be governed by Condition 4 of this Order, not this condition, and/or (3) contract with another agency having appropriate rights to divert and use water from the Carmel River.

Response No. 2.1:

Cal-Am continues to pursue acquisition of permits to legalize diversions from the Carmel River. The Draft SEIR - 2 for the Carmel River Dam and Reservoir Project has been delayed by the Monterey Peninsula Water Management District; they have indicated the document will not be released until Plan B is promulgated by the PUC, tentatively scheduled for the 2nd quarter of 2001.

ORDER CONDITION NO. 3

- (a) *Cal-Am shall develop and implement an urban water conservation plan. In addition, Cal-Am shall develop and implement a water conservation plan based upon best irrigation practices for all parcels with turf and crops of more than one-half acre receiving Carmel River water deliveries from Cal-Am. Documentation that best irrigation practices and urban water conservation have already been implemented may be substituted for plans where applicable.*
- (b) *Urban and irrigation conservation measures shall remain in effect until Cal-Am ceases unlawful diversions from the Carmel River. Conservation measures required by this Order in combination with conservation measures required by the District shall have the goal of achieving 15 percent conservation in the 1996 water year and 20 percent conservation in each subsequent year.²³ To the extent that this requirement conflicts with prior commitments (allocations) by the District, the Chief, Division of Water Rights shall have the authority to modify the conservation requirement. The base for measuring conservation savings shall be 14,106²⁴ AFA. Water conservation measures required by this order shall not supersede any more stringent water conservation requirement imposed by other agencies.*

Response No. 3(a):

Cal-Am's *Urban Water Management Plan* was heard at the January 27, 2000 meeting of the Monterey Peninsula Water Management District. Vote for acceptance of the Plan was unanimous with no public opposition.

10/19/00

Cal-Am continues to work with the Monterey Peninsula Water Management District to develop a database of "water budgets" deemed appropriate and necessary usage for Peninsula consumers. This is a requirement of the MPWMD's *Expanded Water Conservation and Standby Water Rationing Plan*.

The Monterey Peninsula continues to be in Stage 3 of the MPWMD's *Expanded Water Conservation and Standby Rationing Plan*. This stage of the conservation plan required implementation of step rates for consumers. These step rates provided very limited water consumption at approximately \$2 per unit of water, increasing by approximately 50% for the second increment of consumption, and increasing an additional 60% for the third increment. An additional 100% increase in cost at approximately \$10.50 per unit for water consumption and above the 5th increment. Consumers have responded to the need for water conservation. The water production figures reflect this savings by being under the State requirement for the Water Year by 2.3%.

The company produced and distributed a special end of the "Water Year" report to Monterey Peninsula residents. A copy of this paper is enclosed for your information. Monthly newspaper advertising and water bill inserts continue to keep consumers informed on the water situation. A copy of the newspaper "Thank You" ad to Cal-Am customers is attached.

ORDER CONDITION NO. 3

- (a) *Cal-Am shall develop and implement an urban water conservation plan. In addition, Cal-Am shall develop and implement a water conservation plan based upon best irrigation practices for all parcels with turf and crops of more than one-half acre receiving Carmel River water deliveries from Cal-Am. Documentation that best irrigation practices and urban water conservation have already been implemented may be substituted for plans where applicable.*
- (b) *Urban and irrigation conservation measures shall remain in effect until Cal-Am ceases unlawful diversions from the Carmel River. Conservation measures required by this Order in combination with conservation measures required by the District shall have the goal of achieving 15 percent conservation in the 1996 water year and 20 percent conservation in each subsequent year.²³ To the extent that this requirement conflicts with prior commitments (allocations) by the District, the Chief, Division of Water Rights shall have the authority to modify the conservation requirement. The base for measuring conservation savings shall be 14,106²⁴ AFA. Water conservation measures required by this order shall not supersede any more stringent water conservation requirement imposed by other agencies.*

Response No. 3(b):

For the water year October, 1999 through September 2000, the established goal for the Carmel Valley was 11,285.0 AF. Actual production for the twelve month period from both surface and well diversions in the Carmel Valley was 11,178.5 AF, or .94 percent under goal. The overall production, including Carmel Valley and the Seaside Basin was 14932.8 AF, or 2.29 percent under the total twelve month system goal of 15,285.0 AF.

ORDER CONDITION NO. 4

Cal-Am shall maximize production from the Seaside aquifer for the purpose of serving existing connections, honoring existing commitments (allocations), and to reduce diversions from the Carmel River to the greatest practicable extent. The long-term yield of the basin shall be maintained by using the practical rate of withdrawal method.

Response No. 4:

During the water year October 1999 through September 2000, Cal-Am extracted 3,753.5 AF from the Seaside Basin. The plan is to maximize Seaside extraction's up to a limit of 4000 AF. Cal-Am's management of Seaside Basin extraction's is based on the Memo of Agreement between the MPWMD, Cal-Am and California Department of Fish and Game, adopted as part of the MPWMD's Water Supply Strategy by the board of directors. The agreement includes the relaxation of production from the basin during the winter months to allow recharge and maximization of production during the summer months to reduce impacts of water production on the Carmel Valley basin. Cal-Am will continue this water management plan which will assist in maintaining the production goal limits for the Carmel Valley Basin and with the continuation of river flows to the Lagoon.

In September, US Fish & Wildlife Service submitted its draft final version of the Agreement for protection of the red-legged frog for Cal-Am's Carmel Valley operations. The Agreement provides protection under the federal Endangered Species Act for Cal-Am's Carmel Valley operations provided certain express conditions are met. Cal-Am submitted comments on October 12. A final version ready for signing is expected before the end of the year.

During the past quarter, Cal-Am met with National Marine Fisheries Service several times and has agreed to extend the geographical area of the Joint Habitat Conservation Plan (Jt-HCP) to include the San Clemente and Los Padres reservoirs. Cal-Am is in the process of hiring a consultant to work on the expanded area which will be incorporated into a combined Jt-HCP.

ORDER CONDITION NO. 5

Cal-Am shall satisfy the water demands of its customers by extracting water from its most downstream wells to the maximum practicable extent, without degrading water quality or significantly affecting the operation of other wells.

Response No. 5:

Cal-Am is including in this final water year quarterly report the monthly production data for September 2000 from specific sub-units in the Carmel Valley via Carmel Valley wells. Carmel Valley Filter Plant produced 11.4 AF, with 78.1 AF from Aquifers No. 1 and No. 2; Water West - 10.9 AF; Aquifer No. 3 - 654.5 AF; Aquifer No. 4 - 191.7 AF. Total production for the month of September was 946.6 AF. Applying an adjustment of +.04 AF for the Begonia Iron Removal Plant Backwash, brings the net production to 946.6 AF in September 2000.

Status of wells:

Lower Carmel Valley Wells

Rancho Canada - On Line
San Carlos - On Line
Cypress - On Line
Pearce - On Line
Schulte - On Line
Manor - On Line
Begonia #2 - On Line
Berwick 7 - Out of Service for rehabilitation until further notice.
Berwick 8 - On Line

Upper Carmel Valley Wells

All upper wells are in normal summer use pattern. By Memorandum of Agreement with the MPWMD and Department of Fish & Game, these wells are not operated during summer months except for maintenance purposes.

Panetta 1 - Off Line (run 8hrs/day for 7 days only for maintenance purposes)
Panetta 2 - Off Line (run 8hrs/day for 7 days only for maintenance purposes)
Garzes 3 - Off Line
Garzes 4 - Off Line (run 8hrs/day for 7 days only for maintenance purposes)
Los Laureles 5 - Off Line
Los Laureles 6 - Off Line
Scarlett 8 - Off Line
Robles - Off Line
Russell 2 - On Line
Russell 4 - On Line

ORDER CONDITION NO. 6

Cal-Am shall conduct a reconnaissance level study of the feasibility, benefits, and costs of supplying water to the Carmel Valley Village Filter Plant from its more nearby wells downstream of the plant. The objective of supplying water from the wells is to maintain surface flow in the stream as far downstream as possible by releasing water from San Clemente Dam for maintenance of fish habitat. The results of the study and recommendations shall be provided to the District and DF&G for comment.

Response No. 6:

In accordance with the terms of Order No. 98-04, the Reconnaissance-Level Feasibility Study of the Operational Reconfiguration of Lower Carmel Valley Wells has been completed and was submitted to the State Board on June 21, 1999.

It is our understanding that SWRCB staff will be issuing their findings within the next quarter.

10/19/00

ORDER CONDITION NO. 7

Cal-Am shall evaluate the feasibility of bypassing early storm runoff at Los Padres and San Clemente Dams to recharge the subterranean stream below San Clemente Dam in order to restore surface water flows in the river at an earlier date. The results of the study and recommendations shall be provided to the District and CDF&G for comment.

Response No. 7:

Cal-Am hired Entrix to finalize the subject studies. The completed studies were mailed to the SWRCB on July 5, 2000.

ORDER CONDITION NO. 8

Cal-Am shall conduct a study of the feasibility, benefits, and costs of modifying critical stream reaches to facilitate the passage of fish. The study shall be designed and carried out in consultation with DF&G and the District. The results of the study and recommendations shall be provided to the district and DF&G for comment.

Response No. 8:

Cal-Am hired Entrix to finalize the subject studies. The completed studies were mailed to the SWRCB on July 5, 2000.

ORDER CONDITION NO. 12

Within 90 days of the date of this order, Cal-Am shall submit for the approval of the Chief, Division of Water Rights:

- (a) A compliance plan detailing the specific actions which will be taken to comply with condition 2 and the dates by which those action will be accomplished;*
- (b) An urban water conservation plan;*
- (c) An irrigation management plan.*

Response 12(a):

We have been informed by the Monterey Peninsula Water Management District (MPWMD) that the new anticipated date for release of the Draft SEIR-2 for the Carmel River Dam and Reservoir Project for public comment will be in the first quarter of 2001.

Plan B, the alternative being developed by the California Public Utilities Commission as a result of legislation passed by Assemblyman Keeley (AB 1182) is in progress. A public workshop was held on August 2, 2000 in Monterey to present the PUC's Component Characterization Report. Fifteen components in five categories were offered for public review and comment. Comments were received by the CPUC's consultant, EDAW, Inc. and Plan B will be presented in a public meeting in December, 2000.

10/19/00

The MPWMD recently voted to merge the analysis of Plan B in the Carmel River Dam and Reservoir Project. The Board position is that a more extensive analysis will result in a E.I.R. that will be certifiable and, from which a solution to the water supply problem may be selected.

Notes:

1. The minimum pool requirements at Los Padres and San Clemente Reservoirs are 81 acre-feet @ elevation 880 ft and 74 acre-feet @ elevation 515 ft, respectively.
2. Projected inflow for August and September 2000 period is based on the recession of reconstructed unimpaired flows at San Clemente Dam from April 1 to July 25, 2000.
3. Projected inflow for the October 2000 through December 2000 period is based on the expectation that unimpaired flows at San Clemente Dam will equal median historical flows (1958-96).
4. Calculated inflow to San Clemente Reservoir is distributed 82% above Los Padres Dam and 18% between Los Padres and San Clemente Dams.
5. Estimated evaporation is based on average monthly reservoir surface area and gross monthly evaporation rates developed by US Army Corps of Engineers (1981).
6. Diversion rate of 0.5 cfs at San Clemente Dam is for purpose of analysis. Maximum average diversion of 3.0 cfs is allowed during this period, but not expected due to operational constraints at CVFP.

Why worry about water?

Monterey Peninsula:

The Monterey Peninsula usually gets plenty of rain during any given year. That's why we have many forests, with so much moisture, why should the Monterey Peninsula ever face a water shortage? Perhaps more importantly, what is being done to solve the problem?

Why our water is limited.

For more than 100 years, most Monterey Peninsula water came from the Carmel River. In 1995, the State ordered sharp cutbacks on using Carmel River water during the "water year" which runs from October through September.

Today, the Monterey Peninsula water allowance is based on this Annual State Limit. Each month, our water usage is monitored to make sure we are within the State Limit for the current Water Year. Exceeding the Annual State Limit could mean fines of up to \$3 million per year - fines we would all like to avoid.

How we're doing today.

The extent to which the Monterey Peninsula must conserve today results from how much we used earlier in the year.

This Water Year, there was very little rainfall in December and January. As a result, Monterey Peninsula customers exceeded the year-to-date water limit during the first several months.

So we asked you to lighten down the taps and save even more water than usual.

And you are doing it!

Monterey residents and businesses have conserved water like never before. We are very near the Annual State Limit, even after the early dry months, so don't stop now. There are still two months left in the Water Year!

A long term solution.

Except in a drought year, the Monterey Peninsula gets enough rainfall to meet everyone's needs without heroic levels of conservation.

The real problem isn't how much water we get, the problem is how to store it.

The practical question is this: How can we hold onto rainfall so we can use it in the dry months?

"Plan A" Solution.

Our biggest source of water now lies in reservoirs far up the Carmel River. For decades, water experts have been studying ways to expand the Los Padres Dam and Reservoir.

The State and Federal governments have approved permits to build a new reservoir on the Carmel River. But an expanded reservoir cannot be built without approval from the Monterey Peninsula Water Management District (MPWMD), the California Public Utilities Commission (CPUC) and two Federal agencies.

Despite the controversy, experts still believe an expanded reservoir is the best answer for Peninsula customers because it offers:

- The best assurance of a reliable water supply for our existing customers.
- The lowest cost solution for Cal-Jan customers.
- The most environmentally sensitive solution. An enlarged reservoir can enable us to release more water during the year to provide a stable environment for fish, frogs and other species that live in and around the river. Also, steelhead trout could more easily pass up the river for breeding because of a new, better fish ladder.
- A water supply that is locally controlled, not subject to decisions made somewhere else based on the needs of water users elsewhere.

"Plan B" Contingency

While government agencies diligently study the environmental impacts of a replacement dam and reservoir, the CPUC is also studying a contingency known as "Plan B."

Some elements being studied for Plan B include:

- Restoring capacity at existing Carmel River reservoirs by removing accumulated silt.
- Pumping water into old or new wells, to hold water underground for use during dry months (called "injection and recovery").
- Desalination (removing salt from ocean water for use as drinking water).
- More aggressive conservation by water users.

The CPUC will hold public hearings to discuss Plan B. CPUC's staff and consultants will explain the costs and environmental issues of various options.

Cal-Jan is fully cooperating with these studies and stands ready to implement any plans that are approved by MPWMD, State and Federal authorities.

You can help.

Until a solution is in place, we all need to use water wisely. It all adds up, and each of us can help get under the limit and stay there through the end of September.

At home: Can outside irrigation to a bare minimum by using a timer (you can get one at any neighborhood hardware store). Run your washing machine and dishwasher only with a full load. Take showers instead of a bath. Fix leaks and repair them.

At work: Restaurants and hotels should only serve water upon request. Don't use water to wash down sidewalks or buildings or for dust control.

For more information or tips about how you can save more water in your home or business, please call us at 646-3705.

California-American Water Company

Peninsula partner in protecting the environment since 1882.

While these water saving tips are a good idea for everyone, these water use restrictions do not apply to residents of Santa Cruz, Gilroy, Eureka, Ukiah or Ocean Ranch.

We salute our customers for their help. Cal-Am's Carey Billante, Operations Supervisor; Nestor Dorsey, Landscape Maintenance; Terry Ryan, Vice President & Manager; Craig Evans, Pump Operator; and, Mariya Torres, Water Conservation Clerk.

Here's To You.

**You have again complied with the State Order
that limits Monterey Peninsula water use.**

September 30 marked the end of the "Water Year", the twelve-month period the State uses to enforce limits on water use. Together, we made it. We used 2.3% less than our allocation, and avoided steep fines.

You should be proud of your success. By meeting the State's limit on water use, you helped avoid fines that could have reached \$3 million. Costs we all want to avoid.

Monterey Peninsula water users are perhaps the most water-smart consumers in California. You and your neighbors consume less water than other communities – about half as much as people in Los Angeles.

We wish we could thank you for your excellent conservation by telling you it's over. Unfortunately, that's not how it works. As of October 1 it's a new water year and a new challenge. We need to remain vigilant in how we use water.

As the rainy season begins, please turn off automatic sprinklers. Hotels and restaurants can help by only serving water upon request.

As you continue to do your part through conservation, we will continue to do our part by working with government agencies towards a solution.

From all of us at Cal-Am, thanks for your good work conserving water.

California-American Water Company

While these water saving tips are a good idea for everyone, the water use restrictions do not apply to residents of Ambler Park, Bishop, Hidden Hills and Ryan Ranch.
