Subject: Filing of Notice of Determination in compliance with Section 21108 and 21152 of the Public Resources Code

Project Title: Santa Ana River Water Right Applications for Supplemental Water Supply

State Clearinghouse Number: 2002071062

Lead Agency Contact Person: Randy Van Gelder and John Rossi

Project Location: Counties of San Bernardino and Riverside

Project Description:

Muni and Western have jointly filed two applications with the State Water Resources Control Board to appropriate water from the Santa Ana River. The applications seek the right to divert up to 200,000 acre-feet per year of local water to help meet anticipated demands. Newly appropriated water will increase regional water supply reliability, provide an additional source of local, high quality, long-term water supply, and improve operational flexibility in water management. The project would capture water from the Santa Ana River and put that water to reasonable beneficial use in the Muni/Western service area through direct use, groundwater recharge, or exchange. Muni/Western do not propose to export water for use outside their service areas. Any water conveyed outside the service areas would be returned via exchange as soon as practical. Existing facilities would be used to the extent possible to divert and convey newly appropriated water from the Santa Ana River. Project-related facilities would be designed to connect existing facilities with new or modified facilities so that supplemental water supplies can be efficiently used to meet local needs. New project-related facilities would be constructed or existing ones modified in four areas identified below:

- A. The Seven Oaks Dam and Reservoir Construction Area includes modification of the intake structure of Seven Oaks Dam and relocation of the access road serving the intake structure.
- B. The Santa Ana River Construction Area includes the Plunge Pool, Low Flow Connector, and Morton Canyon Connector II pipelines. All of these are new facilities and are located at the mouth of the Santa Ana River canyon.

- C. The Devil Canyon Construction Area includes the new Devil Canyon By-Pass Pipeline.
- D. The Lower Lytle Creek Construction Area includes the new Lower Lytle Creek Pipeline and Cactus Basins Pipeline.

This is to advise that San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County, the Lead Agencies, have approved the above described project on March 21, 2007, and have made the following determinations regarding the above described project:

- 1. The project will have a significant effect on the environment.
- 2. An Environmental Impact Report was prepared for this project and certified pursuant to the provisions of CEQA.
- 3. Mitigation measures were made a condition of the approval of the project.
- 4. A mitigation monitoring and reporting plan was adopted for this project.
- 5. A statement of Overriding Considerations was adopted for this project.
- 6. Findings were made pursuant to the provisions of CEQA.

This is to certify that a copy of the Final EIR with comments and responses and record of project approval is available for viewing by the general public at:
