Subject: AB 2121

I'm a resident of The Sea Ranch, where we already conserve water much more than most communities.

But I'm very worried that the policies which AB2121 will be imposing will mean that we won't have enough water for our population, and to fight house fires which could then ignite our huge fuel load and start a firestorm.

We need to be able to draw water from our deep wells into the aquifer. The water there is not from the river, but from a different source.

Please exclude The Sea Ranch from the imposition of conditions which would make our continued residence here untenable.

CE Brown
