Subject: COMMENT LETTER AB2121 POLICY - SWRCB Instream Flow Policy
CC: <ecarrillo@sonoma-county.org>

My wife and I are full time residents of The Sea Ranch, and as a result of the above referenced bill, very serious negative impacts are possible, including the lack of water for days, weeks, or even longer.

This policy should be reviewed as to its negative effects as well as the positive effects it has for Californians. The economic impact it would have on us in terms of property values could be devastating, especially given the current economic climate throughout our state and country.

This proposed policy assumes that what is good for one area of California is good for all. It was meant to address inland conditions far different than the ones we have here in the Gualala river. This is a very poor way to implement policy.

We urge you to have the policy revised to require that all impacts be taken into account.

Thank you

Don & Carrie Krieger
