AB2121 POLICY PROPOSAL
Jeanine Townsend, Clerk to the Board
SWRCB

We are adamantly opposed to the policy proposal from the staff. As residents of the small community at Sea Ranch, California, our lifestyles and property values would be adversely affected by the proposed policy in a major way as would residents of the neighboring community in Gualala, California whose livelihoods are highly dependent on the Sea Ranch community. It is ironic that the Sea Ranch community which is well-known and highly regarded for its conservation-minded approach to water and other natural resources should be treated in such a punitive manner with respect to its water supply when so many other public and private consumers in California continue to be profligate in their approach and usage of water.

We encourage you to rethink this policy as it is unfair in its approach and outcomes to several entire communities here on the North Coast of California. Have some courage to go after the State's major abusers of water conservation instead of penalizing those who are working hard to reduce their consumption already.

Respectfully,
Greg and Anne Evans
