**Subject:** Comment letter-AB2121 Policy

---

To Ms Janine Townsend, Clerk to the Board:

You are no doubt receiving lengthy letters from Sea Ranch regarding the subject policy. There will probably be duplication in many of these comments regarding the lack of time to respond as well as the lack of any specific science regarding the Gualala River. We just want our comments on the record as supporting all of those specific comments. Some people may think that Sea Ranch is just a resort/vacation community, but there is a large group of us who live here full time. We would not be able to retreat to our main residence [we have no other home] in case of a water shortage. While not a specific Gualala River issue, if we are not able to flush into our sewer system, there is no telling where this waste would go.

Please consider the many problems that have apparently not been considered in your decision making regarding this policy.

Respectfully,

Pat and George Haas
