Dear State Water Resources Control Board:

I live at, have a business and have employees at The Sea Ranch, in Sonoma County California and our water supply is the watershed of the Gualala River. I am very concerned about the implementation of AB 2121, 2004 in the following ways:

- It is unclear if it allows for and provides an adequate water supply for our community.
- What will the economic impacts be to the Sea Ranch/Gualala area, jobs, services, tourism and home values?
- The Gualala river is a clean river in terms of water pollution but suffers from silt and sedimentation and does need restoration work for a good fish/wildlife habitat. Can the State and Local Sea Ranch/Gualala Community collaborate towards the restoration of the river?

I hope that my concerns can be taken into account and that a fair and just implementation can be worked out.

Sincerely

Steve Mader
