

- Policy Area Boundary
- Subterranean Flow
- Potential Stream Depletion Area
- Mapped stream channel and associated alluvial deposits within a potential stream depletion area. Wells pumping from these deposits are likely to result in greater and more immediate stream depletion.

DELINEATION OF SUBTERRANEAN STREAMS AND POTENTIAL STREAM DEPLETION AREAS

CAPELL VALLEY QUADRANGLE

FEBRUARY 6, 2008

INDEX TO USGS 7.5' QUADRANGLES

REFERENCE

Delattre, M.P., and Sowers, J.M, 2006, Geologic map of the Capell Valley 7.5-minute quadrangle, Napa County, California; A digital database: California Geological Survey, Preliminary Geologic Maps, scale 1:24,000.

Note: Because the delineated areas on this map were based on information readily available at the time of its development, this map does not claim to represent all of the subterranean streams or potential stream depletion areas that exist in the area. Site specific investigations will be needed to verify the existence of subterranean streams or potential stream depletion areas.
