

- Subterranean Flow
- Potential Stream Depletion Area
- Mapped stream channel and associated alluvial deposits within a potential stream depletion area. Wells pumping from these deposits are likely to result in greater and more immediate stream depletion.

DELINEATION OF SUBTERRANEAN STREAMS AND POTENTIAL STREAM DEPLETION AREAS

SONOMA QUADRANGLE

FEBRUARY 6, 2008

REFERENCE
 Wagner, D.L., Clahan, K.B., Randolph-Loar, C.E., and Sowers, J.M., 2003. Geologic map of the Sonoma 7.5-minute quadrangle, Sonoma and Napa counties, California; A digital database: California Geological Survey, Preliminary Geologic Maps, scale 1:24,000.

INDEX TO USGS 7.5' QUADRANGLES

Note: Because the delineated areas on this map were based on information readily available at the time of its development, this map does not claim to represent all of the subterranean streams or potential stream depletion areas that exist in the area. Site specific investigations will be needed to verify the existence of subterranean streams or potential stream depletion areas.
