Subject: Klamath Dams Removal
Date: Monday, February 4, 2019 9:49:49 PM

I write in support of the conclusions of the draft EIR. The Klamath is an historic, iconic river that used to support large runs of steelhead and salmon that cannot recover without removal of the dams. Here in the State of Washington, we know first-hand the tremendous impact that dam removal can have on the health of a river with the removal of the two dams on the Elwha River. I urge you to adopt the Draft EIS and keep the project on track.
