Subject: I strongly urge- Nix dam relicensing!

Although dam owner PacifiCorp has supported dam removal within the scope of the Klamath Settlement Agreements, the company has simultaneously taken steps to relicense its dams. In August 2014, PacifiCorp applied for a Clean Water Act certification from the state of California – a prerequisite to dam relicensing. This certification process allows the California State Water Board to set conditions for dam relicensing that are binding on the Federal Energy Regulatory Commission.

Do your job- Protect our lands, waters, wildlife, future & health! You work for citizens- Not industry!

Your attention to this most urgent matter would be much appreciated by all present & future generations of all species.

Thank you
