**To:** Barnes, Peter@Waterboards  
**Subject:** Pit+1+flushing/whitewater+flows -- Don't throw out the baby with the bathwater -- or diminish summer flushing flow w/o good reason

The decision to eliminate summer flushing flows to benefit the Shasta crawfish is illogical, because similar reductions in crawfish population in the water basin occurred regardless of water flushing .

It seems this decision is an attempt to conserve water (laudable, always), but at the expense of boaters who use the summer flows, and without logical reason.

Please reconsider.
